TECHNICAL QUALIFICATIONS

BIM-Based Architectural Modeling
Development of coordinated digital models to ensure design accuracy, workflow efficiency, and interdisciplinary integration.

Permit & Construction Documentation
Preparation of detailed architectural drawings for municipal approval and on-site execution in compliance with local regulations.

Technical Detail Development
Production of precise and buildable architectural details that meet both structural standards and design aesthetics.

3D Visualization & Rendering
Creation of photorealistic visuals to effectively communicate design intent and enhance project presentations.

Site Coordination & Supervision
Hands-on experience in construction site processes, focusing on implementation accuracy, scheduling, and quality control.

Material Selection & Interior Finishes
Strategic decision-making in material selection aligned with the design narrative, budget, and project specifications.

Freelance Architectural Services
Providing client-focused solutions tailored to project-specific needs — from concept development to final delivery, both locally and internationally.
